## FFI 24 FT. MOWER

The 24ft. mower is powered by a 20 hp engine with direct drive hydraulic pumps. Each cutterbar has its own pump to provide equal power. A six spool valve provides control of the cutterbar lifts, front & rear steering and the safety shank (hitching post). The main beam of the frame is the hydraulic reservoir.

### SAFETY FEATURES.

- All cutting mechanisms are in front.
- Safety shank hydraulically put in ground ties horses.
- Foot pedal engages cutterbars, if released sickles stop.
- Relief valve for each hydraulic motor to protect sickles.
- Trip release on side bars & shearpin on center bar, to protect bars from damage.

### MECHANICAL FEATURES.

- ESM Cutterbars.
- 4 horses & 1 operator.
- Circular cutter on center bar to prevent clogging.
- No side draft.
- Center bar telescopes forward for longer hay.
- Floating floor & self leveling seat for a smooth ride.
- Individual switches to disengage a cutterbar if needed.
- Short tongue fits on rear end to transport mower.
- Front & rear steering for easy turning.
- Hydraulic brakes (optional).
